

# ST. EDMUND'S NEWS

**What's been going  
on this week at  
school!**

## DESIGN AND TECHNOLOGY WEEK

You could have heard a pin drop in our school this week as the children sat their end of term assessments. To complement their hard work, each class participated in a project in the afternoons with a focus on Design and Technology. We had classes researching and preparing wraps and spaghetti bolognese, researching and designing steady hand games, sling shot cars and moving vehicles, hand sewing pillows and designing boats.

## CLASS TRIPS

Learning outside of the classroom is so important and this is why class trips are vital in providing our children experiences and opportunities to apply their learning in different contexts.

This week, Year 4 visited a working farm where they not only fed the baby lambs but they learnt how farms work to provide from farm to fork.

Year 6 ended the week with a trip to the Science Museum in London. They learnt how computers and game consoles have developed since 1976 and how coding is used to improve the gaming experience.

## MESSAGE FROM MRS STONEHAM

What makes you so excited that it makes you cheer and clap? A sports team winning a match, being awarded a shining light certificate, seeing someone else achieve something that you know they have been struggling with – are all answers from our children this week. We have been learning about the Easter story and how people were so excited when Jesus entered Jerusalem riding a donkey and shouting Hosanna! Little did they know that the days that followed were to be dark and filled with sadness and how important it is to come together to shine our lights to help each other.

1 Thessalonians 5:11 'so continue encouraging each other and building each other up, just like you are doing already.'
